

1. DR xx — xx

Status: Open

Subject: Namespace names as default values

Qualifier: Technical defect

Submitter: MURATA Makoto **Organization:** JISC

Contact Information: eb2m-mrt@asahi-net.or.jp

Submitter's Defect Number: None

Supporting Document(s): None

Date Circulated by Secretariat: 1900-01-01

Deadline for Response from Editor: 1900-01-01

IS 29500 Reference(s): Parts 1 and 4, A.4.1, "DrawingML – Main"

Related DR(s): None

Nature of the Defect:

Although this is not stated in prose of 29500:2008, the default value of the minVer attribute in dml-diagram.xsd is a namespace name. Since the AMD1 makes the conformance classes "Strict" and "Transitional" use different namespaces, the default values in the conformance classes "Strict" and those in "Transitional" will be different. This discrepancy makes the conversion between the two classes unnecessary difficult.

Solution Proposed by the Submitter:

If we do not really need default values for @minVer, drop them.

Schema Change(s) Needed: Yes

Editor's Response:
