

# 1. DR xx — xx

**Status:** Open

**Subject:** unqualified div elements in v:textbox elements

**Qualifier:** Technical defect

**Submitter:** MURATA Makoto   **Organization:** JISC

**Contact Information:** [eb2m-mrt@asahi-net.or.jp](mailto:eb2m-mrt@asahi-net.or.jp)

**Submitter's Defect Number:** None

**Supporting Document(s):** None

**Date Circulated by Secretariat:** 1900-01-01

**Deadline for Response from Editor:** 1900-01-01

**IS 29500 Reference(s):** Part 4, A.6.1 "VML – Main" and B.6.1 "VML – Main"

**Related DR(s):** None

**Nature of the Defect:**

The XSD and RNG schemas in 29500-4 do not allow v:textbox of VML to have unqualified <div> elements as children, although those in Ecma-376 (1st Ed) do by <xsd:any namespace="##local" processContents="skip" />. However, existing docx documents contain such <div> elements for representing HTML fragments.

**Solution Proposed by the Submitter:**

Ideally, use qualified elements in the XHTML namespace. If this is not possible, revise the schema for allowing unqualified elements and add a note about such unqualified elements.

**Schema Change(s) Needed: Yes**

**Editor's Response:**

XX

**Changes to Part 1: N Part 2: N Part 3: N Part 4: Y**
